Aside from Yellow, most of the songs are pretty easy. This pack is for people who just really like Coldplay, it won't really give you a huge challenge except for the bends in Yellow.

. It has potential, but currently it's not particularly engaging once you get familiar with the basic mechanics of the game. For example, it's relatively easy to turtle and then just build loads of drones/helicopters to pummel the enemy base.

That being said, the devs are pumping out regular updates so thumbs up based on that.. NS fans... please come play! ;). it was good. The choose-your-own adventure game I've been waiting for!

Choice of the Rock Star isn't one of the longer or deeper Choice of Games, but it's full of charm and each playthrough is just the right length to make me want to dive back in to live a different life, with a wide range of possibilities for your band and career. I recommend this game to anyone who's ever loved music.. It's a great comic and a great soundtrack, but they can all be found online or you can just download them from somewhere. It isn't worth much money, and definitely not \$6.00. If you want to have it very officially, then buy this, but I'm just saying: Everything that this includes can be found somewhere else, in a more convenient place.. 1. For vive users, you need to lean a bit forward to use controller properly. I agree that the crossair position needs to be adjusted, but it is definitely playable in its current stage.

2. Game takes at least 2 hour to complete, and have a 15 mins exposition/tutorial. So when you see reviews with 0.4 hour played, it means they gave up half way through chapter 1.

3. It is a rail shooter because managing shield and varies weapon systems will occupy both of your hands. If that 0.4 hour reviewer played a bit more and unlocked more weapons, he would understand how painful it would be to simultaneously holding up a shield, switching weapon with the other hand, and also manage movement all at the same time.. Pros: Good music, fun gameplay, challenging

Cons: No instruction

I would recommend this game. It is cheap, fun, and challenging. My only real complaint is that there is no instructions for the game. It doesn't tell you any controls or what the goal of the game is. If you want to see some gameplay of the first zone check out the video below.

<https://www.youtube.com/watch?v=xYpaW0iAKb8>. Addictive. more a IOS game than a PC game. Well made with story.

Short but rather well made. The volume was a tad too high at the end, but I get the point they were trying to make. Its free. Can't complain.. It was worth what I paid. Not much more to say other than that.. By far my favorite module.

Low level acrobatic flight and simply taking in the scenery is pleasant in a Sim with this level of visual fidelity. This is a forgiving yet fun plane, especially if you're looking for something light to fly for a change of pace. I can't attest to the flight model accuracy, but it is a public release of a study module ED has created under contract, so I expect it's realistic enough. The plane is honestly one of the most immersive bits of aviation simulation on the market, helped by excellent audio and visual detail.

I wouldn't recommend this as a first module, unless you're sure you have the patience to stick to a single limited trainer. This is a good first full fidelity module, to learn after FC3. My only gripe is short of the landing gear, any damage isn't visually represented.

All in all, a great little Soviet trainer.. Well... what can i say, game is old and has short Singleplayer but playing this was really enjoyable

P.S. i got this for free :). Ranking system sucks, full of new accounts cheaters or bots, reporting players and explaining stuff to admins will get you negative karma on site or even admin abuse and ban after. Even if its free to play it will be super stressful experience.

Tip for new people do not think that you will get more frags on this site because its 128tick if you are LEM or lower in MM you need to stay away from this site if you can't rank up in MM dont waste money.

Also full of wannabe pro's who think they play good and they talk smart stuff best tip will be /MUTE IN game, it will help you alot and you can focus on your game if you care.

1 out of 15 games you will have good laugh with your team and you will enjoi your 6.77£ investment + drinks because you dont like that game without good alcohol.

. this fun little game and I love HO games sometime I all way looking out for any new HO games to come out on to steam and the price is right I buy and the price is to high not going to buy and this game the new york mysteries the lantern opf soul this is a good little and it fun to play it. YOU ♥♥♥♥ED THIS GAME AND THE PEOPLE WHO PAID FOR IT. This seven year old is literally a better game dev than I will ever be. Keep it up!
