Close up, you can see Jack is a short man with a round face awash with freckles and a slightly crooked nose. You'd put him as aged twenty or so, though malnourished city dwellers often look younger than they really are. He has a wiry frame that masks the surprising strength that years of carpentry has gifted him. An apprentice's life is one of drudgery, and he is not the first nor will he be the last to turn to petty thievery.

Jack takes a step back and puts up his hands in a gesture of conciliation.

"You look like a decent cove—perhaps we could work something out. Do you really want to see a man hang for a few poxy silver spoons?"

- "If it means I get paid, I'm happy to see you hang."
- "You knew the penalty when you committed the crime."
- "I don't have a choice here. If I don't bring you in, then someone else is sure to."
- "You're right, I don't want to see you hang."

I know there are a ton of fans of *Letter Quest: Grimm's Journey* out there, and I appreciate that. I get the casual charm this title brings, and why people enjoy it. With that being said this title is too standard, the feel too mobile, and the core mechanic too old for me.

Letter Quest: Grimm's Journey is a build-a-word adventure game built around mobile grind mechanics. It all works well enough, and if you get into it - you are gonna have a good time. The part that I get hung up on is that the core mechanic of building words is ages old, and frankly has been done to death. Even with some interesting variations thrown in, it just does not compel me. I do appreciate the mobile/lite RPG grind for loot and awards to add replayability, but to be fair the whole thing feels paper thin.

Again, the problem here is that this title just isn't something that is for me - but I tried it and will weigh in for my Steam friends. If you are looking for a more progressive typing-based game, I'd check out [Epistory - Typing Chronicles](#) or [maybe Typing of the Dead: Overkill](#). I'm not necessarily recommending them, but they have a bit more 'game', and bring a bit more freshness to the genre.

Pros:

- [+If you get into this, you'll have a fun time](#)*
- [+The price-point is fair, and it is often on sale](#)*

Cons:

- [-There are many word-building typing-based games, and I fail to see what this one does that makes it stand out](#)*
- [-Feels too mobile to me \(both the interface and the grindy awards system\)](#)*
- [-I don't find it all that fun, frankly](#)*

[You know what this is. If you are on the fence, I'd suggest waiting for the frequent sale.](#)
