About This Game

World of Cinema – Movie Tycoon is a extensive simulation game.

You make yourself a name in the movie business by producing better and better movies until, one day you get to manage a studio in Hollywood. Then you're able to produce real blockbuster movies and expand your studio to a business empire.

In World of Cinema there are various game options along with the producing, such as merchandising, marketing, sabotage, poster design and much more. Special quests and funny incidents make this game never get boring.

world of cinema movie tycoon download. world of cinema - movie tycoon

Very basic, graphics and gameplay, when you consider THE MOVIES game was over ten years ago this game seems to be ten years before that, lacking in content and playability.

In making your own movies? well unless this games animation improves later on with owning a studio, forget it.

I found this game boring for the most part but might revisit it because I like the genre.

Don't waste your money hopefully a decent updated movie game will come along soon.

Summary - Plays like an old Commodore 64, text and pictures and not much action also webpages link not working.. This game in it's current format is completely unplayable. The game breaks entirely by day 31, and even though I had only made one film by that point, I really was not totally upset by not having to play any more. The game lacks any real feedback on what makes good combinations for the most part and the lack of customisation is extremely disappointing. For example, I decide to make a film set in the Stone Age, but there are no Stone Age themed characters. Then at day 31, the game shows a pop-up that regenerates infinitely. It is quite incredible how disappointing this turned out to be. Then there is the fact that the game required me to install an additional application just to run which I was not expecting and it is extremely poorly translated in places. These issues and the droning music barely seem worth mentioning in comparison to the abject awfulness of the main game. Spend that money on almost anything else.. Way to many bug, I cant even load the first script It glitches when i click next script or even when i click buy script... biggest waste of money!!.. One word: Laggy.. Status:

"ABANDONED\BROKEN"

***** CRAP STAIN ALERT!*****

Since our last review back in April 2015 something has happened to the game or developer. It does not work properly and not one patch since his release. Single german developer who we talked with when the game released, has apparently decided to take the money he made and ran or take a permanent\u2665\u2665\u2665\u2665\u2665on society and fans. Either way, the only safe assumption since it sold very well, and since... critckets or farts in the wind... is all we know.... he had a great thing, and kind of as it stands now in 11/14/2015 total garbage now. So this guy is in need of a good fonging!

Never even completed the English translations either. Sad again. Does anyone finish anything anymore?

Discalimer; The Review Crew's evaluations are based on paying close attention to forum response and activity, system demand, fun of the game genre, position of originality in respective genre, growth of the project in its current state at time of review, graphics as a whole for end user, presentation of the game and display, replayability, patch\patch progress, beginner friendliness & gameplay direction, content & depth, attention to detail on small things(polish), lag and multiplayer application if applicable, badge card availability, with a minimum 8 hours of gameplay and interaction with customer base after release. We are not affiliated with any specific brand or entity or on any payroll. All views are based on positive only feedback as we are in no position to criticise anyones craft, just current states of development and progress at the time of our participation. If we offend anyone with our content, it was not us! Our review was hacked!. World of Cinema - Movie Tycoon. More than just a MOVIE TYCOON! A uuuuuuge disappointment that'll make you request a refund after five minutes of playtime.. The idea is solid, the execution... not so much.

Making movies sounds cool, except you can't really see or understand what you're doing half the time, and the things you do understand seem pretty bad. Making the poster comes off like something from a 3rd grade art project and when I tried to upload an image myself, the game crashed.

Maybe it can be fixed... but I doubt it.

I'd stay away.

Way to many bug, I cant even load the first script It glitches when i click next script or even when i click buy script... biggest waste of money!!.. Really wanted this to be a better Tycoon game. Showtime! is a better Movie Tycoon. Don't buy this one.. Thought this might be a fun game. Unfortunatly when starting it says to put your name in player 1 i do that and i cant see what im typing untill i hit enter then it shows the name. so i start the game and inside the game when i try to look through menu's ect or pick from the list to put people or things in the movie i cant read anything in the bubbles where the options should be they are blank. so i have to pick blind? and an then maybe see what i have picked after its to late. this makes the game unplayable. anyone know how to fix that?

hmm toying around with things i went to the steam file an loaded it up in the win mode it give and can actually see the text unfortunatly its in window mode and id rather play in full screen. but yes mine also wouldnt go past day 31 either. After the bug was fixed it seems to be working just fine. Game is fun to pass some time.

Old Review -

Game breaking bug on day 31. Sabotage pop up that will not go away. Reloading does not solve and unable to play any further.. awefull, waste of money. seems like a cool game they sorted that bug out . keep the updates comeing guys like say when you choose your actors when you hire them can you make them disapear in the list just to make things a little easier. awefull, waste of money
